Table of Contents	TC - C1
Common Design Guidelines	C - 1

TABLE OF CONTENTS

PART ONE - WATER DESIGN GUIDELINES

1. Types of Pipelines.	W - 1
a. Service Mains.	W - 1
b. Distribution Mains.	W - 1
c. Transmission Mains.	W - 1
2. Pipe Materials.	W - 2
a. General.	W - 2
b. Allowable Pipe Material.	W - 2
3. Types of Pipe Joints.	W - 3
a. General Requirements.	W - 3
b. Appropriate Usage in Design.	W - 5
4. Selection of Pipe Material.	W - 6
a. General.	W - 6
b. Selection of Pipe Class and Wall Thickness.	W - 6
c. Depth of Cover Greater Than WSSC Requirements.	W - 6
d. Wall Thickness of DIP for Special Applications.	W - 7
5. Total Internal and Transient Pressures.	W - 9
a. Total Internal Pressure.	W - 9
b. Working Pressure.	W - 9
c. Surge (Transient) Pressures.	W - 10
6. Buckling Design.	W - 11
a. Criteria.	W - 11
b. References.	W - 11
7. Allowable Fittings.	W - 12
a. Bends.	W - 12
b. Tees.	W - 12
c. Cross.	W - 13
d. Tapping, Sleeve and Valve (TS&V).	W - 13
e. Tapping, Assembly and Valve (TA&V).	W - 14
f. Welded-on Boss Outlets.	W - 17
g. Plugs and Caps.	W - 18
h. Wyes.	W - 18
i. Reducers.	W - 18
j. Adapters.	W - 19
k. Solid Sleeves and Mechanical Couplings.	W - 19
l. Offsets.	W - 21
m. Other Fittings.	W - 21

8. General Horizontal Alignment.	W - 22
a. General.	W - 22
b. Considerations.	W - 22
c. Horizontal Alignment - Location.	W - 22
9. Connections to Water Pipelines.	W - 24
a. Design of the Connection.	W - 24
b. Revising Designed Connections During Construction.	W - 26
c. Labeling Existing Pipelines.	W - 26
d. Special Items.	W - 27
10. Relocating Water Pipelines.	W - 28
a. General.	W - 28
b. Design Requirements.	W - 28
c. Alignment - Horizontal and Vertical.	W - 28
11. Vertical Alignment - General Requirements.	W - 30
a. General.	W - 30
b. Design Requirements.	W - 30
12. Vertical Alignment - Profile Requirements.	W - 31
a. Profile Grade Lines.	W - 31
b. Stationing of Pipelines.	W - 33
c. Design of the Pipeline on Profile.	W - 33
13. Allowable Joint Deflections.	W - 36
a. General.	W - 36
b. Push-on Joint Pipe.	W - 36
c. Mechanical Joint Pipe.	W - 36
d. Restrained Joint Pipe.	W - 37
e. Determining Joint Deflections and Offset Distances.	W - 42
14. Rotation of Fittings.	W - 43
a. Rotation of Bends.	W - 43
b. Rotation of Tees.	W - 49
c. Rotation of Other Fittings.	W - 49
15. Joint Deflections at Fittings.	W - 50
a. Requirements.	W - 50
16. Deflection of Pipe Joints.	W - 51
a. General.	W - 51
b. Alignment Design.	W - 51

17. Design of Structures.	W - 54
a. WSSC Standard Details.	W - 54
b. Special Design Structures.	W - 54
c. Setting of Frames and Covers or Hatches.	W - 54
d. Pipeline Materials for Special Structures.	W - 55
e. Design of Structures on Profiles.	W - 55
18. Tunnels or Casing Pipes.	W - 56
a. Requirements.	W - 56
19. Appurtenances.	W - 57
a. General.	W - 57
b. Design Requirements.	W - 57
20. Pipeline Valves.	W - 58
a. General.	W - 58
b. Design Requirements.	W - 58
c. Types of Gate Valves.	W - 61
d. Design Requirements for Gate Valves.	W - 62
e. Horizontal Gate Valve Vault Design for Pipelines Larger Than 16".	W - 63
21. Air Valves.	W - 65
a. General.	W - 65
b. Design Requirements for 16" and Larger Pipelines.	W - 65
c. Sizing of Air Vacuum Valves.	W - 66
d. Sizing of Air Release Valves.	W - 67
e. Location of the Air Valve or Combination Air and Vacuum Valve.	W - 67
f. Connecting the Air Valve or Combination Air and Vacuum Valve to the Mainline Pipe.	W - 68
g. Piping and Vault Configuration.	W - 68
h. Specification Requirements.	W - 69
22. Entry Ports.	W - 71
a. General Requirements.	W - 71
b. Piping and Vault Configuration.	W - 71
23. Air Valves with Entry Port.	W - 74
a. General Requirements.	W - 74
b. Piping and Vault Configuration.	W - 74

24. Specialty Valves.	W - 75
a. Altitude Valves.	W - 75
b. Pressure Reducing Valves, (PRV).	W - 76
c. Pressure Relief Valves, (Relief Valve).	W - 78
d. Swing Check Valves.	W - 79
e. Backflow Preventers.	W - 80
f. Butterfly Valves.	W - 80
g. Eccentric Plug Valves.	W - 80
h. General Valve and Piping Arrangements in Vaults.	W - 81
25. Fire Hydrants.	W - 83
a. General Requirements.	W - 83
b. Fire Hydrant Settings (Horizontal).	W - 84
c. Fire Hydrant Leads.	W - 84
d. Fire Hydrant Spacing.	W - 85
26. Blowoff Connections.	W - 86
a. Requirements.	W - 86
b. Special Requirements.	W - 86
c. Type of Blowoff Connections.	W - 86
d. Connections on Mainline Pipe.	W - 90
e. Vertical Requirements.	W - 91
27. Water House Connections (WHC).	W - 92
a. General Requirements.	W - 92
b. Types of Service Connections.	W - 92
c. Horizontal Alignment.	W - 92
d. Vertical Alignment.	W - 95
e. Size of WHCs.	W - 97
f. Allowable Pipe Material for WHCs.	W - 97
g. Connection of the WHC to the Mainline Pipe.	W - 98
h. Insulated Joints on WHCs.	W - 99

APPENDIX

Appendix B	WSSC Design Criteria for Water Distribution Systems.	W - 101
a.	Flows.	W - 101
b.	Hydraulic Design.	W - 102

CHARTS

Chart "A"	Rotation of Bends.	W - 48
-----------	--------------------	--------

FIGURES

Figure "A"	Pipeline Joint Deflections.	W - 42

Table "6"	Tap Sizes vs. Class of Ductile Iron Pipe.	W - 100
Table "7"	Hazen-Williams C - Values.	W - 102

TABLE OF CONTENTS

PART TWO - SEWER DESIGN GUIDELINES

1. Types of Pipelines.	S - 1
a. Lateral or Branch.	S - 1
b. Collector Sewer.	S - 1
c. Outfall Sewer or Trunk Sewer.	S - 1
d. Interceptor Sewer.	S - 1
2. Pipeline Materials.	S - 2
a. General.	S - 2
b. Allowable Pipe Material.	S - 2
c. Allowable Pipe Joints.	S - 2
d. Special Pipe.	S - 2
e. Labeling Existing Pipelines.	S - 3
3. Selection of Pipe Material (Gravity Sewer).	S - 4
a. Selection of Pipe Material.	S - 4
b. Selection of Pipe Class and Wall Thickness.	S - 5
4. Pipe Class Design.	S - 6
a. General.	S - 6
b. Maximum Allowable Cover.	S - 6
5. Fittings.	S - 7
a. Horizontal and Vertical Bends.	S - 7
b. Tees, Wyes and Saddles on Mainline Sewers for SHCs.	S - 8
c. Bends and Wyes on Mainline Sewers for Drop Manhole Connections.	S - 8
d. Stopper, Caps and Plugs.	S - 8
e. Other Fittings.	S - 8
6. General Horizontal Alignment.	S - 9
a. General.	S - 9
b. Considerations.	S - 9
c. Horizontal Alignment - Location.	S - 9
7. Curved Horizontal Alignment.	S - 10
a. General.	S - 10
b. Pipe Sizes.	S - 10
8. Relocating Sewer Pipelines.	S - 12
a. General.	S - 12
b. Design Requirements.	S - 12
c. Alignment - Horizontal and Vertical.	S - 12

9. General Vertical Alignment.	S - 15
a. General.	S - 15
b. Design Requirements.	S - 15
10. Vertical Alignment - Profile Requirements.	S - 16
a. Profile Grade Lines.	S - 16
b. Stationing of Pipelines.	S - 18
c. Design of the Pipeline on Profile.	S - 18
11. Vertical Alignment - Pipe Slope.	S - 20
a. General.	S - 20
b. Minimum Pipe Size.	S - 20
c. Minimum Pipe Slopes.	S - 20
d. Maximum Pipe Slopes.	S - 21
e. Pipe Sizes.	S - 21
12. Tunnels or Casing Pipes.	S - 22
a. Requirements.	S - 22
b. Size of the Pipeline in the Tunnel or Casing Pipe.	S - 22
13. Design of Structures.	S - 23
a. Manholes.	S - 23
b. Special Design Structures.	S - 23
c. Setting of Frames and Covers or Hatches.	S - 24
d. Horizontal Location of Manholes.	S - 25
e. Vertical Location of Manholes.	S - 25
14. Types of Manholes.	S - 26
a. General.	S - 26
b. Types of Manholes.	S - 26
c. Labeling Manholes on the Drawings.	S - 27
15. Manhole Spacing.	S - 28
a. Location.	S - 28
b. Maximum Spacing Between Manholes.	S - 28
c. Minimum Spacing Between Manholes.	S - 28
16. Pipe to Manhole Geometry.	S - 29
a. General.	S - 29
b. Minimum Diameter Precast Manholes for Maximum Sewer Sizes.	S - 29
c. Minimum Diameter Brick Manholes for Maximum Sewer Sizes.	S - 30
d. Determining Manhole Diameter.	S - 30
e. Offset Manholes.	S - 33
f. Mechanical Flow Control Devices in Manholes.	S - 34
g. Non-Circular Manholes.	S - 34
h. Special Pipe Openings in Manholes.	S - 34

17. Pipe Slope and Manhole Distance.	S - 36
a. Design.	S - 36
b. High Velocities in Pipelines.	S - 39
c. Pipe Slope 10% or Greater.	S - 39
18. Manhole Drop Connections.	S - 41
a. General.	S - 41
b. Design Requirements.	S - 41
19. Manhole Channel Design.	S - 44
a. General.	S - 44
b. Channel Slope.	S - 44
c. Width of Channel.	S - 47
d. Radius of the Channel.	S - 47
e. Channels for 36" and Larger Diameter Sewers.	S - 48
f. Top of Bench Elevation.	S - 48
g. Width and Slope of the Top of the Bench.	S - 49
20. Manhole Depth Design.	S - 50
a. General.	S - 50
b. Different Types and Sizes of Manholes.	S - 50
21. Manholes Built Over Existing Sewers.	S - 55
a. General.	S - 55
b. Diameter Requirements.	S - 55
c. Design Requirements.	S - 55
d. Depth Requirements.	S - 56
22. Fall Prevention Systems.	S - 57
a. General Requirements.	S - 57
b. Design Requirements for Deep Manholes.	S - 58
23. Adjusting Manhole Frames and Covers.	S - 59
a. General.	S - 59
b. Requirements.	S - 59
24. Diameter of Frames and Covers.	S - 61
a. Requirements.	S - 61
25. Impact of Storm Water Facilities on Existing Sewers.	S - 62
a. General.	S - 62
b. Guidelines	S - 62
c. Coordination.	S - 62
d. Requirements for Impact Assessment.	S - 63
26. Infiltration - Sewerage Structures.	S - 66
a. Infiltration Design.	S - 66
b. Cast in Place Concrete Structures.	S - 66

27. Relief Sewer Design.	S - 67
a. Interaction of Relief Sewer with Existing Sewer.	S - 67
b. Flow Distributions.	S - 68
c. Junction Chambers, Structures or Manholes.	S - 69
d. Horizontal and Vertical Alignment.	S - 70
e. Design Flows for Both Systems.	S - 71
f. Hydraulic Design of Relief Sewers.	S - 71
28. Force Main Design.	S - 74
a. Alignment - Horizontal and Vertical.	S - 74
b. Profile Requirements.	S - 75
c. Allowable Pipe Material and Fittings.	S - 75
d. Force Mains in Tunnels or Casing Pipes.	S - 75
e. Appurtenances and Structures.	S - 75
f. Hydraulic Design of Force Mains.	S - 77
g. Field Testing Requirements for Force Mains.	S - 79
h. Required Analysis for Hydrogen Sulfide (H ₂ S) Generation and Release.	S - 80
29. Grinder Pump, Pressure Sewer System.	S - 81
a. General.	S - 81
b. Design Requirements.	S - 81
c. Appurtenances and Structures.	S - 84
d. Horizontal and Vertical Alignment.	S - 85
e. Required Analysis for Hydrogen Sulfide (H ₂ S) Generation and Release.	S - 86
f. Industrial or Commercial Developments.	S - 86
30. Air Valves.	S - 87
a. General.	S - 87
b. Design Requirements.	S - 87
c. Type and Piping Configuration.	S - 87
d. Design of Air Vacuum Valves and Air Release Valves for Force Mains and Pressure Sewers.	S - 88
31. Sewer House Connections (SHC).	S - 90
a. General.	S - 90
b. Horizontal Alignment.	S - 91
c. Vertical Alignment.	S - 92
d. Size of SHCs.	S - 95
e. Allowable Pipe Material for SHC.	S - 95
f. Maximum Pipe Depth for Pipe Material.	S - 95
g. Minimum Cover Over the SHC.	S - 95
h. Connection of the SHC to the Mainline Sewer.	S - 95
i. Connection of the SHC to a Manhole.	S - 96
j. Pipeline Clearances.	S - 97

33. Hydrogen Sulfide (H ₂ S) Control.	S - 98
a. General.	S - 98
b. Analysis for Hydrogen Sulfide Generation.	S - 99
c. Selection of Sewer Pipe and Structure Materials.	S - 100
d. Additional Design Considerations to Mitigate Hydrogen Sulfide Generation and Release.	S - 100

APPENDIX

Appendix C	WSSC Design Criteria for Sewer Systems.	S - 102
a. Flows.		S - 102
b. Preliminary Hydraulic Design.		S - 103

CHARTS

Chart "B"	Flow-Slope Relationship as a Guide to Sulfide Forecasting, Effective BOD of 300 mg/L.	S - 101
Chart "C"	Manning Formula Solution, $n = 0.013$	S - 104

SKETCHES

Sketch "M"	Fittings on Sewer Pipelines with Different Inside Diameters.	S - 7
Sketch "N"	Labeling Manholes or Vaults on Proposed or Finished Grades.	S - 25
Sketch "O"	Labeling Manholes or Vaults on Existing Grades.	S - 25
Sketch "P"	Manhole Diameter to Pipe OD.	S - 31
Sketch "Q"	Existing Manhole Diameter to Pipe OD.	S - 32
Sketch "R"	Offset Manholes.	S - 33
Sketch "S"	Pipe Manhole Connection for Steep Grades.	S - 34
Sketch "T"	Determining Pipe Length Between Manholes for Sewer Pipelines 48" and Larger.	S - 38
Sketch "U"	Pipe Slope 10% or Greater.	S - 40
Sketch "V"	Manhole Channel Design, 5/6 Flow.	S - 45
Sketch "W"	Manhole Channel Design, 5/6 Flow, Exceptions.	S - 46
Sketch "X"	Minimum Radius of Manhole Channels.	S - 47
Sketch "Y"	Relief Sewer - Flow Control Device (Weir).	S - 68
Sketch "Z"	Determining SHC Invert Elevations.	S - 93

TABLES

Table "8"	Minimum Curve Radius for 24" and Larger Sewer Pipelines.	S - 10
Table "9"	Minimum Pipe Slopes.	S - 21
Table "10"	Maximum Manhole Spacing.	S - 28
Table "11"	Minimum Diameter Precast Manholes for Maximum Sewer Sizes.	S - 29
Table "12"	Minimum Diameter Brick Manholes for Maximum Sewer Sizes.	S - 30
Table "13"	Wall Thickness for Depth of Brick Manholes.	S - 54
Table "14"	Diameter Requirements for Manhole Frame and Covers.	S - 61
Table "15"	Minimum Curve Radius for Pressure Sewers.	S - 85
Table "16"	Preliminary Minimum Slope of Sewer Pipelines 12" Diameter and Smaller.	S - 103

TABLE OF CONTENTS

PART THREE - COMMON DESIGN GUIDELINES

1. Survey and Stakeout Information.	C - 1
a. General.	C - 1
b. Survey Controls.	C - 1
c. Stakeout Controls.	C - 2
2. Right of Ways and Construction Strips.	C - 4
a. General.	C - 4
b. Width Requirements.	C - 4
c. Location of Pipelines Within Right of Ways and Construction Strips.	C - 6
d. Right of Ways for Water Pipeline Appurtenances.	C - 7
e. Construction Strips.	C - 7
f. Access Points Along the Right of Way.	C - 8
g. Property of the Maryland National Capital Park and Planning Commission (MNCPPC).	C - 8
h. Potomac Electric Power Company (PEPCO).	C - 8
3. Pipeline Crossings and Clearances.	C - 9
a. General.	C - 9
b. Vertical Clearances for Pipeline or Utility Crossings.	C - 9
c. Horizontal Spacing and Clearances.	C - 11
d. Crossing Under Existing Pipelines and Utilities.	C - 12
e. Sewers Crossing and Parallel to Water Pipelines.	C - 13
4. Buoyancy of Pipelines.	C - 15
a. General.	C - 15
b. Design Procedures.	C - 15
c. Preventive Procedures.	C - 22
d. Example.	C - 22
e. Reference.	C - 24
5. Pipeline Abandonment.	C - 25
a. General.	C - 25
b. Requirements.	C - 25
6. Modifications to WSSC Specifications and Standard Details.	C - 26
a. General.	C - 26
b. Modified WSSC Standard Details.	C - 26
c. Special Provisions to WSSC Specifications.	C - 27

7. Erosion Checks.	C - 28
a. Requirements.	C - 28
b. Design.	C - 28
8. Sediment Control.	C - 29
a. General.	C - 29
b. Procedures for Obtaining the Erosion and Sediment Control Permit for Major Utility Construction.	C - 29
c. Design Requirements.	C - 32
d. Sediment Control Devices.	C - 34
e. Tree Protection.	C - 47
9. Pipeline Stream Crossing.	C - 48
a. General.	C - 48
b. Selection of Crossing Alignment.	C - 49
c. Data Collection.	C - 50
d. Estimate of Design Flow.	C - 51
e. Determination of Cover Depth.	C - 51
f. Post Construction Stabilization of Channel Banks.	C - 54
g. Special Considerations.	C - 55
h. Design Examples.	C - 55
10. Bridge Crossings.	C - 62
a. Conceptual Design.	C - 62
b. General.	C - 62
c. Predesign Submittals and Approvals.	C - 62
d. Predesign Bridge Crossing Meeting.	C - 63
e. Allowable Pipeline Material.	C - 64
f. Fittings on Bridge Structures.	C - 66
g. Joint Deflections on Bridge Structures.	C - 67
h. Pipelines Coating and Lining Requirements.	C - 67
i. Pipeline Identification.	C - 67
j. Design of Pipelines in Casing Pipes.	C - 68
k. Isolation Valves.	C - 68
l. Location of the Pipeline on the Bridge Structure.	C - 68
m. Buried Pipelines Entering the Bridge Structure.	C - 69
n. Pipe Thrust on the Bridge Structure.	C - 70
o. Pipe Load on the Bridge Structure.	C - 71
p. Attaching the Pipeline to the Bridge Structure.	C - 71
q. Design of the Pipeline for Expansion and Contraction.	C - 72
r. Design of the Pipeline to Prevent Freezing.	C - 74
s. Design of Dewatering and Air Release Appurtenances on Bridge Structures.	C - 74
t. Pipelines to be Abandoned on the Bridge Structure.	C - 75
u. References.	C - 75

11. Evaluation of Load Conditions on Existing Pipelines.	C - 76
a. General.	C - 76
b. Ductile Iron Pipe (DIP) Water Pipelines.	C - 76
c. Cast Iron Pipe (CIP) Water Pipelines.	C - 77
d. Asbestos Cement Pipe (ACP) Water Pipelines.	C - 80
e. Prestressed Concrete Cylinder Pipe (PCCP) Water Pipelines.	C - 81
f. Polyvinyl Chloride (PVC) Pipe Sewer Pipelines.	C - 84
g. Ductile Iron Pipe (DIP) Sewer Pipelines.	C - 84
h. Vitrified Clay Pipe Extra Strength (VCPX), Concrete Sewer Pipe Extra Strength (CSPX), and Asbestos Cement Pipe (ACP) Sewer Pipelines.	C - 85
i. Reinforced Concrete Pipe (RCP), Reinforced Concrete Sewer Pipe (RCSP), Reinforced Concrete Culvert Pipe (RCCP), Reinforced Concrete Culvert Pipe Extra Strength (RCCPX) Sewer Pipelines.	C - 88
j. Ductile Iron Pipe (DIP) Sewage Force Mains.	C - 92
k. Cast Iron Pipe (CIP) Sewage Force Mains.	C - 93
l. Polyvinyl Chloride (PVC) Small Diameter Pressure Sewers.	C - 93
12. Related Design and Analysis.	C - 96
a. Methods to Increase Strength of Pipe Due to a Change in Loading Conditions.	C - 96
b. Field Investigations to Verify Assumptions Made in Analysis.	C - 98
c. Necessity for Pipeline Relocations.	C - 99
d. Methods to Protect Pipelines During Construction.	C - 100
e. Information required for the review of proposed grading on WSSC Pipelines.	C - 101
13. Concrete Encasement, Arches and Cradles.	C - 102
a. General.	C - 102
b. Concrete Encasement.	C - 102
c. Concrete Arches.	C - 104
d. Concrete Cradles.	C - 105
14. Anchoring Pipes on Steep Slopes.	C - 107
a. General.	C - 107
b. Design Requirements.	C - 107
15. Pipe Joint Clearances.	C - 108
a. General.	C - 108
b. Minimum Distances.	C - 108
16. Design of Pipeline Structures.	C - 110
a. General.	C - 110
b. Design Loads.	C - 110
c. Design Criteria.	C - 110
d. Concrete Structures.	C - 111
e. Miscellaneous Metals.	C - 115

17. Evaluation of Existing Pipeline Structures.	C - 117
a. General.	C - 117
b. Analysis.	C - 117
c. Procedure.	C - 117
d. Guidelines and References.	C - 117
e. Structural Components.	C - 119
18. Temporary Construction Support Criteria.	C - 120
a. General.	C - 120
b. Guidelines.	C - 120
19. Geotechnical Considerations for Pipeline Alignments.	C - 121
a. General.	C - 121
b. Geology of the Site.	C - 121
c. Soil Conditions.	C - 121
d. Groundwater Conditions.	C - 121
e. Crossing of Highways and Railroads Requiring Tunneling.	C - 121
f. Crossing of Environmentally Sensitive Areas.	C - 122
g. Proximity to Existing Structures and Other Utilities.	C - 122
h. Need for Deep Cuts or Excessive Fills.	C - 122
i. Need for Special Bedding and/or Backfill.	C - 122
j. Need for Blocking and/or Restrained Joints.	C - 122
20. Geotechnical and Corrosion Review Submittals.	C - 124
a. General.	C - 124
b. Items to be Submitted With the First Review.	C - 124
c. Items to be submitted With the Second Review.	C - 125
21. Lateral Support for Buried Pipelines.	C - 132
a. General.	C - 132
b. Guidelines.	C - 132
c. References.	C - 133
22. Slope Stability Problems.	C - 134
a. General.	C - 134
b. Slope Failures.	C - 134
c. Type of Soils.	C - 134
d. Selection of Pipeline Alignment.	C - 135
e. Method of Stabilization.	C - 135
f. References.	C - 135
23. Pipeline Design in Wetlands.	C - 136
a. General.	C - 136
b. Guidelines.	C - 136
24. Tunnels.	C - 138
a. General.	C - 138
b. Conditions Requiring Tunnels.	C - 138

25. Tunnel Design Criteria.	C - 141
a. General.	C - 141
b. Tunnel Applications.	C - 141
c. Tunnel Casing Length and Diameter.	C - 142
d. Minimum Soil Cover.	C - 144
e. Tunneling Methods	C - 144
f. Clearances With Surrounding Installations.	C - 145
g. Tunnel Soil Investigation Submittals, Tunnel Geotechnical Report.	C - 145
h. Soil Parameters.	C - 147
i. Surface Settlement Estimation.	C - 154
j. Tunnel Design.	C - 157
k. Access Shaft and Jacking Pit.	C - 164
l. Dewatering.	C - 166
m. Tunnel Access Manhole or Temporary Bulkhead.	C - 166
n. Carrier Pipe Tie-Downs.	C - 166
o. Ground Movement Monitoring.	C - 167
p. Codes	C - 167
q. References.	C - 168
26. Thrust Restraint Design for Buried Piping.	C - 174
a. General.	C - 174
b. Concrete Thrust Blocks.	C - 174
c. Restrained Pipe Joints.	C - 185
d. Thrust Blocks for Quick Connections to Existing Pipelines.	C - 191
e. Welded-on Thrust Ring Blocks for New Pipe.	C - 193
f. When and How to Restrain Reducers.	C - 195
g. When and How to Restrain Valves.	C - 198
h. Unbalanced Thrusts at Connections to Existing Water Pipelines.	C - 203
i. Passive Soil Pressure for Concrete Thrust Blocks.	C - 204
j. Blocking Notes on the Drawings.	C - 205
27. Corrosion Control.	C - 206
a. General.	C - 206
b. Corrosion Design Procedure and Submittal Requirements.	C - 206
c. Corrosion Design Requirements.	C - 208
d. Final Design Approval.	C - 210

APPENDIXES

Appendix "D" Subsurface Investigation Requirements for Water and Sewer Design and Construction.	C - 128
a. Soil Boring.	C - 128
b. Laboratory Testing.	C - 129
c. Boring Logs.	C - 130
d. Submittals.	C - 130
Appendix "E" Soil Investigation Required for Soft Ground Tunnel Projects.	C - 169
a. Soil Borings.	C - 169
b. Laboratory Testing.	C - 170
c. Submittals.	C - 171

CHECKLISTS

Environmental Engineering and Science Section - Plan Review Checklist.	C - 31
Corrosion Survey Checklist.	C - 211

FIGURES

Figure "B" Backfill Volumes Over Pipe.	C - 19
Figure "C" Trench Beddings for Circular Concrete, Clay and Asbestos Cement Pipe.	C - 94
Figure "D" Anticipated Ground Behavior Based on D_{10} Size.	C - 151
Figure "E" Compressed Air Pressure for Tunneling in Silty Sands.	C - 153
Figure "F" Error Function Representation of Settlement Trough Above Tunnel.	C - 155
Figure "G" Relationship Between Width of Settlement Trough and Depth of Tunnel.	C - 156
Figure "H" Coefficient of Pressure for Tunnel Design.	C - 158
Figure "I" Dimensionless Anchor Resistance Ratio, A^s/A^o .	C - 184
Figure "J" Earth Pressure Coefficients for Normal Earth Pressure in Front of Block.	C - 184

FORMS

Form "A"	Thrust Restraint Schedule	C - 126
Form "B"	Corrosion Documentation.	C - 212

SKETCHES

Sketch "AA"	Clearances - Pipeline Crossings.	C - 10
Sketch "BB"	Shallow Depth Stream Crossing Utility.	C - 53
Sketch "CC"	Location of Flanged Joint at Structures.	C - 108
Sketch "DD"	Location of Mechanical, Push-on or Plain End Joints at Structures.	C - 109
Sketch "EE"	Profile of Tunnel Crossing MSHA Controlled Access and Interstate Highway.	C - 142
Sketch "FF"	Profile of Tunnel Crossing MSHA Highway Other Than Controlled Access and Interstate Highway.	C - 143
Sketch "GG"	Observation Well.	C - 173
Sketch "HH"	Example of Concrete Thrust Block for Horizontal Bend.	C - 181
Sketch "II"	Example of Restrained Joint System.	C - 188
Sketch "JJ"	Thrust Block Cast Directly Around Reducer.	C - 200
Sketch "KK"	Welded-on Thrust Ring Block to Restrain Reducer (Large End).	C - 200
Sketch "LL"	Welded-on Thrust Ring Block to Restrain Reducer (Small End).	C - 200
Sketch "MM"	Blocking A Reducer When Reducing Down Into A Tee.	C - 201
Sketch "NN"	Schematic Examples of Thrust Vaults For 16" and Larger Valves.	C - 201
Sketch "OO"	Valves 16" and Larger Restrained with Thrust Collar Blocking.	C - 202
Sketch "PP"	Connection PCCP to DIP Showing Unbalanced Thrusts.	C - 203
Sketch "QQ"	Zone of Influence for Passive Soil Resistance.	C - 204

TABLES

Table "17"	Right of Way and Construction Strip Minimum Width Requirements for Water Pipelines.	C - 5
Table "18"	Right of Way and Construction Strip Minimum Width Requirements for Sewer Pipelines.	C - 5
Table "19"	Coefficients of Expansion.	C - 72
Table "20"	Concrete Anchor Spacing for DIP 12" Diameter and Smaller.	C - 107
Table "21"	Empirical Correlation of Soils.	C - 148
Table "22"	Value of P_1 .	C - 159
Table "23"	Length of Straight Pipe Required in Front of Reducer.	C - 197
Table "24"	Length of Straight Pipe Required in Front of Valves.	C - 199
